Announcement of a new partnership for the world wide marketing and sales of PROMAXON[®] into the friction market

LAPINUS FIBRES will be distributing the PROMAXON[®] material as from June 01st, 2011

Dear Madam, Dear Sir,

Promat International NV hereby announces that with a recently implemented new business model, the PROMAXON[®] distribution into the world wide friction market will be outsourced to an external partner.

Therefore a partnership between the very well known raw material supplier LAPINUS FIBRES and Promat International NV has been established, in which LAPINUS FIBRES will be the dedicated partner to distribute the PROMAXON[®] material to the friction industry.

Whereas the new situation will enable Promat International NV to concentrate on its qualities as a reliable long term producer of the PROMAXON[®] material, LAPINUS FIBRES will give detailed technical support for the use of the PROMAXON[®] material in friction applications and support you with a value added distribution service.

To implement the new structure technically, the responsible sales manager of LAPINUS FIBRES, Mr. Peer Gijsen, will contact you shortly. You will be supplied by LAPINUS FIBRES as from **June 1st, 2011**.

For further questions and discussions about this issue the manager of the PROMAXON[®] division Dr. Karl Stefan Dewald and the Manager of the LAPINUS FIBRES' friction division Mr. Mark Segeren will be at your disposal any time.

s.dewald@promat.be – phone: +49 171 83 72 152
mark.segeren@lapinusfibres.com – phone: +31 653 36 85 84

Many thanks for your kind cooperation in these matters.

Sincerely yours

Dr.-Ing. Karl Stefan Dewald
Division Manager PROMAXON[®]
